

2016 Fall Lecture Series

Date: Nov 8th 2016

Speaker: Jo-Anne McArthur

Background: Photojournalist, author and activist

Title: **“We Animals: Stories of Love and Liberation”**

Description: Jo-Anne welcomes you to journey with her around the world, to meet some of the animals she's encountered and look at our complex and often difficult relationships with them. In this hour-long presentation, you'll meet gorillas rescued from the bush meat trade in West Africa, bears freed from bear farms in southeast Asia, a chicken in a wheelchair, circus animals and other animals in entertainment, the animals we call food, and some wonderful sanctuaries around the world that are making this a kinder, gentler place for animals. The presentation's goal is to allow us to see our relationship with animals with new eyes, leaving the audience thoughtful, inspired and galvanized.
